Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 April 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) 1-9 and 20-31 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 10-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 October 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

Election/Restrictions

Applicant's election of claims 10-19 in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election without traverse of claims 10-19 in Paper No. 9 is acknowledged.

Claims 1-9 and 20-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese'614. Japanese'614 teaches a method and apparatus for the cooling of hot rolled steel strip including a run out table (3) with plural rotating transfer rolls (7), cooling means (5) for cooling the hot rolled steel strip on the run out table, and water breaking means (4) in the form of rolls which are movable up and down with respect to the strip to provide a clearance in a synchronized manner, where both the cooling means and water breaking means are arranged both above and below the strip on the run out table, and a fluid ejecting means (11) arranged behind the water breaking means, thereby showing all aspects of the above claims since the actual speed at which the water

breaking rolls are rotated (claim 13) is at best a suggested use of the instantly claimed apparatus, and as such cannot alone be relied upon to fairly further limit the instant apparatus claims. See *In re Casey*, 152 USPQ 235 and MPEP 2114.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 11, 15, 16, 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hollander et al in view of Japanese'018. Hollander et al teaches a method and apparatus for the cooling of hot rolled steel strip including the use of a run out table including a plurality of transfer rolls (103), cooling means (131, 132) arranged on both sides of the strip (top and bottom) showing all aspects of the above claims except for the additional use of a water breaking means located at least at the outlet of the cooling means. Japanese'018 teaches that it was known in the steel strip cooling art at the time the invention was made to employ water breaking means (10) after cooling means (5) in order to prevent coolant water from adhering to the strip, thereby improving the final strip quality produced. Because improved strip quality would also be desirable in the system described by Hollander et al, motivation to include a water breaking means (10) as described by Japanese'018, after the cooling means of Hollander et al in order to improve the quality of the final product produced, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.
